Controlled Access Consultants, Inc. offers a complete scheduled maintenance program that can greatly improve the quality and functionality of your gate and electronic entry system.

Regular inspections and basic maintenance will extend the lifecycle and reduce annual service costs through early detection.

Our rates are reasonable and quotes are individually customized for each customer. Additionally, preventative maintenance customers receive a generous discount on parts needed for repairs.

We have been serving the needs of Northern California's gated communities for over 30 years.

Our technicians are factory trained and "certified" in all aspects of access control and are familiar with all types of gates and manufacturers.
